

# Cyanogen Update Tracker Privacy Policy and legal information

## User data

Cyanogen Update Tracker currently stores the following user data:

- Unique token for push notifications
- User selected device and update method
- Date and time of last device and / or update method setting change.
- App version number used to submit the data mentioned above.

All data is used to send push notifications to the user, not for more, not for less purposes.

No other personal information is collected / stored by this app. Please note that this app uses Google Admob for advertisements, which means that Google *may* collect user data from users using this app. This data is, however, outside of my control. Please contact Google for their privacy policy if you have issues.

## App permissions

The permissions used are required to establish a network connection to the update server (Internet), verify if the device is connected to the Internet (Access Network State) and to download the update files (Write External Storage). Users of Android 6.0 or higher only need to grant the Write External Storage permission if they click on the download button for the first time (Runtime permissions feature).

## Legal information

This is not an official app from Cyanogen. Cyanogen® and Cyanogen® OS are trademarks of Cyanogen® Inc. Visit <http://cyngn.com/about> for more information about Cyanogen®.

Android® is a registered trademark of Google Inc. Visit <https://www.android.com/> for more information about Android.

## Network usage

This app communicates to:

<https://cyanogenupdatetracker.com/api/v2.1>

These network requests are used to grab lists of devices, update methods and to retrieve update information (since November 2015). The app previously used an API from <https://fota.cyngn.com> but this is no longer the case as of November 2015.

## Open Source content

This app uses the following open-source third-party add-ons:

Joda Time: <http://www.joda.org/joda-time/>

Jackson JSON processor: <http://wiki.fasterxml.com/JacksonHome>

Android Action Bar Style Generator: <http://jgilfelt.github.io/android-actionbarstylegenerator/>

Android asset studio: <https://romannurik.github.io/AndroidAssetStudio/>

All libraries are open-source and are free-to-use. Original licenses apply where possible.
